RX-Universe™

MODULAR LAB MANAGEMENT SOFTWARE

Rx-Universe

LAB MANAGEMENT SOFTWARE

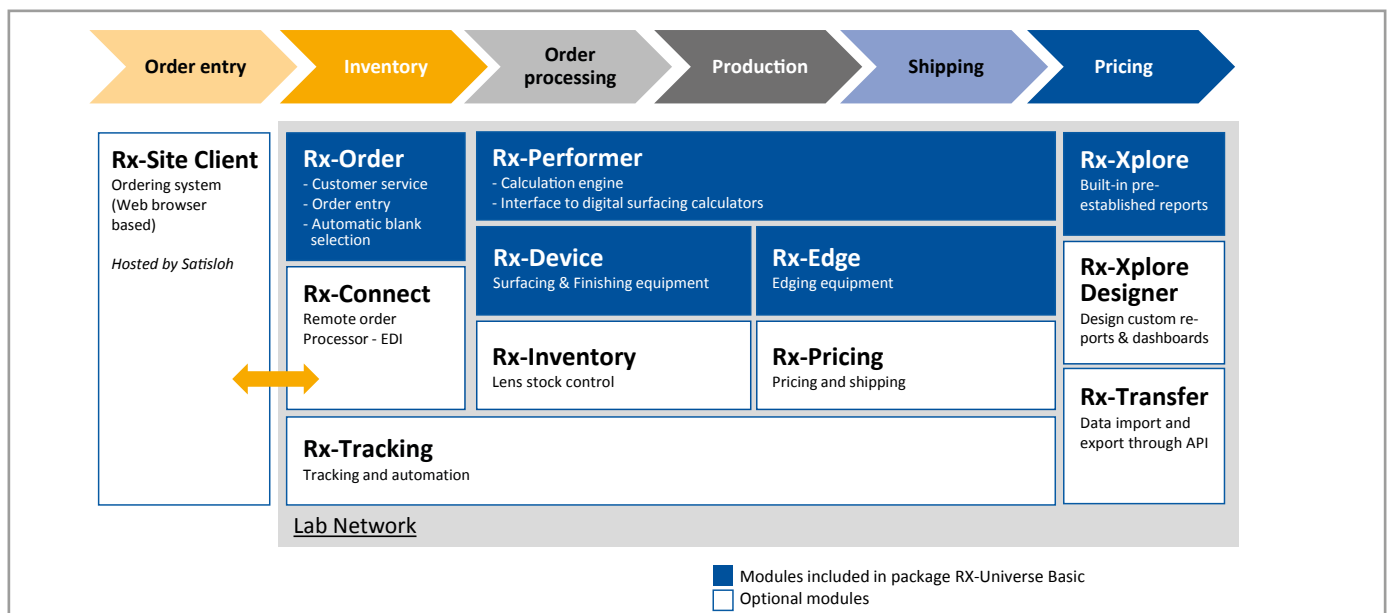

Rx-Universe software is the ideal solution for all types of labs looking for a reliable and easy-to-use Rx lab management software. Its modular design adapts to any lab size and structure, thus perfectly fits the needs of small in-store with 20 jobs/day just as well as large labs producing 5,000+ jobs/day.

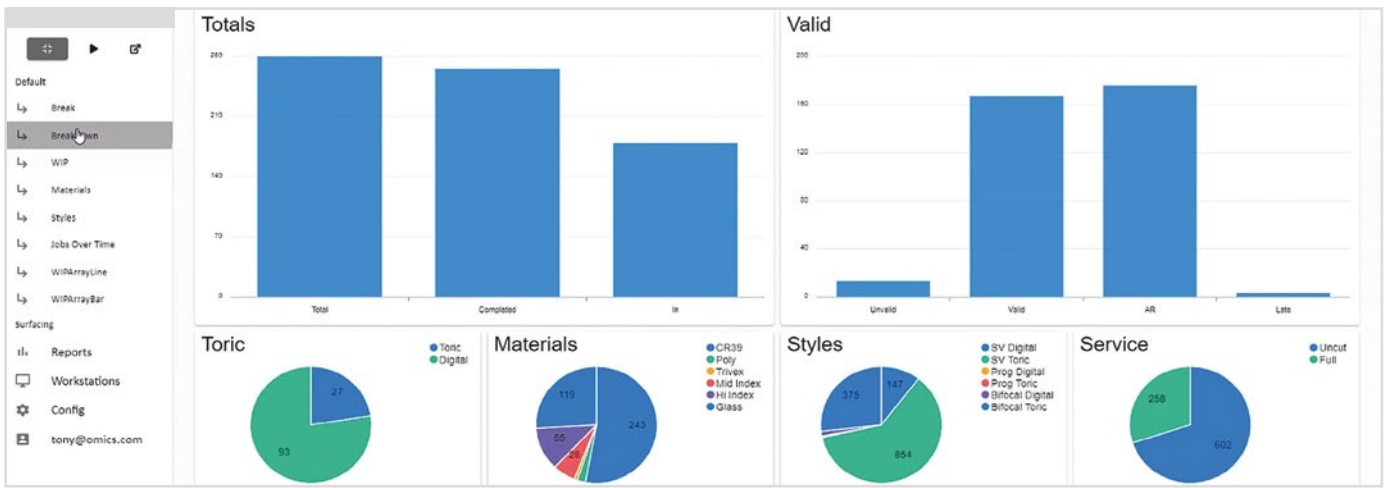

The multilingual Windows™ based software manages processing information for the complete Rx production, calculates and processes standard and digital backside surfaces and fully supports even complex jobs such as wrap calculation, special bevels, saddlebacks, etc.

Rx-Universe interfaces with latest machines and software from Satisloh as well as from other manufacturers. A pre-loaded lens database features the most popular types, additional lens products can easily be added and maintained. The latest browser based technology helps users access and build dashboards and reports to display production KPI's. Unlike many other LMS in the market, any connections of available lens

design software (LDS) to Rx-Universe are completely free of charge. New software features are also automatically implemented without any surcharges.

Satisloh's worldwide multi-language support does not end with the software itself – it provides full process support for the complete lens manufacturing process so you can always be sure that all production steps interact perfectly. The seamless connection to Satisloh's MES-360 rounds off the product and makes it a tool that should not be missing in any production environment today.

Rx-Xplore Designer module to design customized reports and dashboards

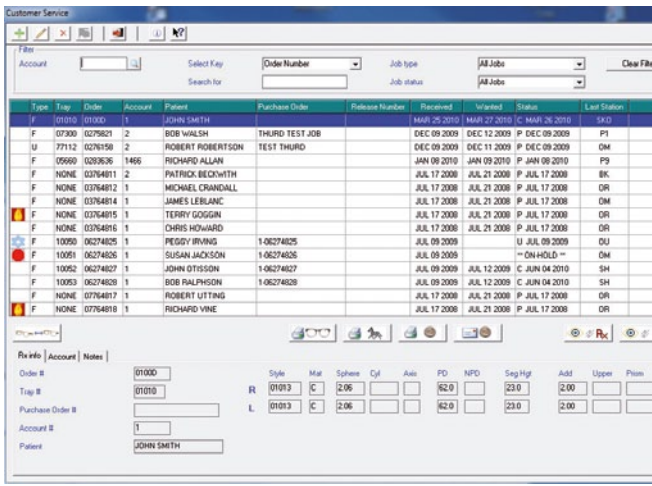

PACKAGES & MODULES OVERVIEW

Modules		Rx- Universe Basic	Rx- Universe Easy (Metro-Lab)	Rx- Universe 360	Rx- Universe Toric
		for labs producing >100 - 5,000+ jobs/day	max. 100 jobs/day	>100 - 5,000+ jobs/day	max. 100 jobs/day
Standard modules	Rx-Order manages order entry and order processing information	●	●	●	●
	Rx-Device interfaces with all production equipment (Satisloh and third party devices)	●	●	●	●
	Rx-Edge connects and communicates with finishing equipment	●	●	●	
	Rx-Performer Digital integration to digital design calculators	●	●	●	
	Rx-Performer Toric calculation engine for standard toric Rx lenses	●	●	●	●
	Rx-Tracking tracks and manages job flows	○	●	●	
	Rx-Xplore access to built-in pre-established reports	●	●	●	
Extended modules	Rx-Connect inbound electronic order processor and lab to lab transfer	○	●	●	
	Rx-Pricing manages commercial price lists, creates pricing documents, and exports invoice data	○	●	●	
	Rx-Inventory control physical stock lens, semi-finished lens, and frames ¹⁾	○	●	●	
	Rx-Xplore Designer design custom reports and dashboards to display production KPIs	○	○	●	
	Rx-Site remote customer order placement with order tracking	○	●	●	
	Rx-Transfer enables data export through API connection	○	○	●	
Included Licenses required to add client workstations, machine interfaces, digital calculators, etc.		10*	10*	15*	1

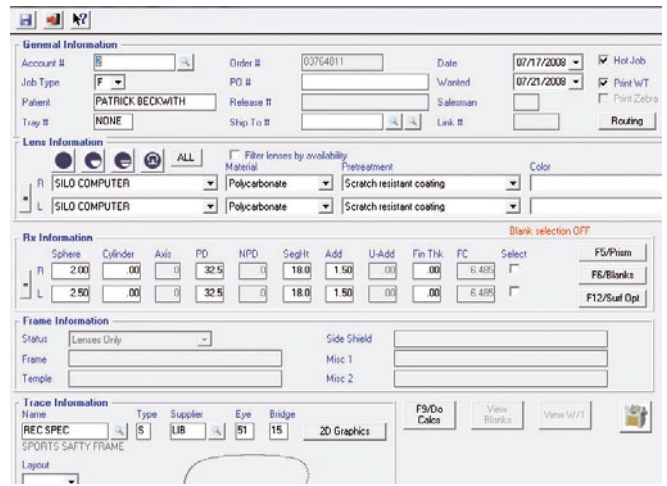

¹⁾ frame inventory available starting late 2020

● included ○ optional

* additional licenses can be purchased in sets of 5 licenses

TECHNICAL INFORMATION

System Requirements:

All networks must have a Windows 2008/2012/2016 32/64-bit server class operating system

File Server Specification:

- Windows 2008/2012/2016 server 32/64-bit
- 16 GB or more RAM
- 100 GB of free hard drive space
- Backup system (tape, external USB disk drive, web-based backup)
- Dual or quad-core processor recommended
- Antivirus software
- Open port 5640, 6523 on router

Workstation Specification:

- Windows 10
- 8 GB or more RAM

Peripherals:

- Laser printer
- Bar code reader (optional)

Connections:

- Internet
- Teamviewer (for technical support)
- 1 USB-port for security dongle
- 100/1000 Mbit LAN connection

Device Interfaces:

- Each workstation must have access to multiple serial ports, either by means of a multi serial card in the computer or a TCP/IP board providing multiple serial interfaces
- Compatible with any Windows multi-serial IO cards
- Supports VC DCS serial and TCP/IP interface protocol

An ongoing service and maintenance agreement is required. More detailed specifications are available on request.
